Tramlines 9, 10 to tram stop Haldenbach.
Dear colleagues

It is with great pleasure that we invite you to join us for the First Cancer Research Day of the Cancer Center Zürich. We would like to take this occasion to provide an update on our ongoing efforts to establish an internationally visible Comprehensive Cancer Center in Zurich. Moreover, major experimental and clinical research projects from some of our leading research areas in oncology in Zurich will be presented. Finally, we will conclude with a special lecture on the concept and vision of Comprehensive Cancer Centers in Europe, given by Prof. Emile Voest.

Thank you very much for your interest and your support for the development of oncology in Zurich.
